ALEAS BOARD

RELEASE #2022-11

WHAT IS NEW?

ALEAS BOARD RELEASE #2022-11

Dear ALEAS Board user,

we are very excited to be able to roll-out another new version of ALEAS Board. Our team have been busy during the last months with implementing the switch to a new framework for an even better board experience, which is one of the major improvements included in the 2022-11 release.

What can you expect from the new release?

added

- **Board export:** Export complete boards or board sections as a pdf file – which is especially useful when needing to share the board with someone external or to save a copy for backup or documentation.
- **New templates:** We have added a selection of new templates to the Template Manager, e.g. a 1:1 Meeting template, new retrospectives, a low-high matrix and many more.

improved

- **Performance optimization:** You will be able to notice even faster loading times due to the latest technology.
- **Automatic reconnection:** The board reconnects and refreshes automatically after a connection loss – it's not necessary to refresh manually any longer.
- **Description editor:** During presentation mode, changes in the description editor are now transmitted in real-time to all viewers – making presentation mode even better for remote meetings!
- **Stickies per board:** The maximum number of stickies per board has been increased to 3.000, allowing for even more flexibility.
- **Licensed users:** The number of licensed users is now displayed in the system admin menu and updated in real-time.

For detailed information on all tools and features have a look at aleasboard.com.

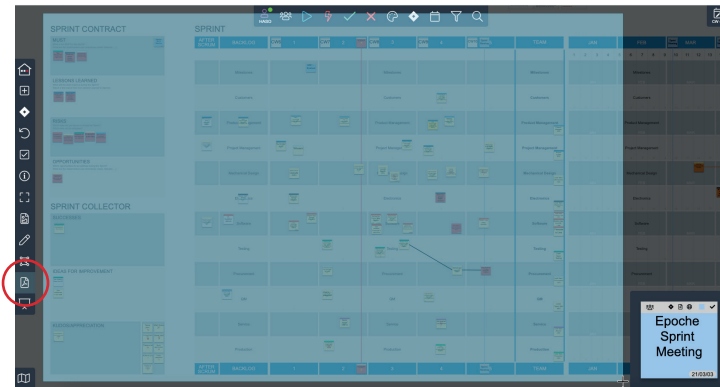

As always we appreciate your ideas, suggestions and feedback!
You can contact us at support@aleas.li.

All the best,
the team at ALEAS

IMPROVEMENTS

ALEAS BOARD RELEASE #2022-11

BOARD EXPORT

In addition to the backup feature it is now possible to export boards as pdfs – a quick way to save a local backup or document the current status of the board and to share boards with external team members. The „export board as pdf“ function can be found in the menu bar on the left. You can easily choose the section you want to export and save a pdf locally.

AUTOMATIC RECONNECTION

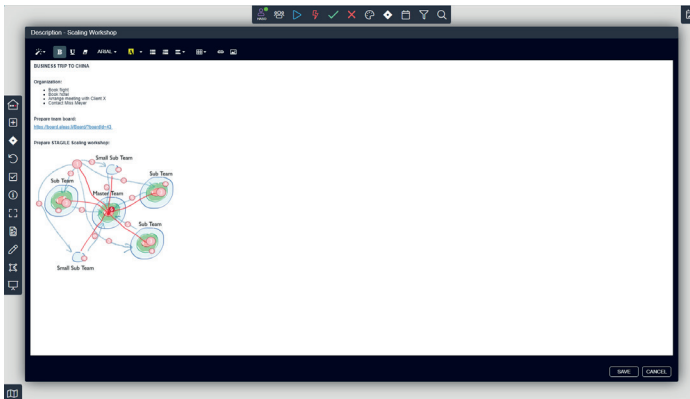

It is no longer necessary to refresh the board after a loss of connection. The board now reconnects and refreshes automatically whenever necessary, saving you any waiting time.

IMPROVEMENTS

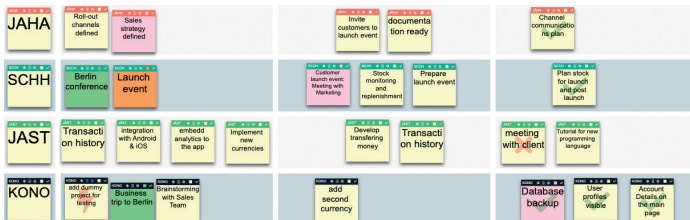

ALEAS BOARD RELEASE #2022-11

DESCRIPTION EDITOR

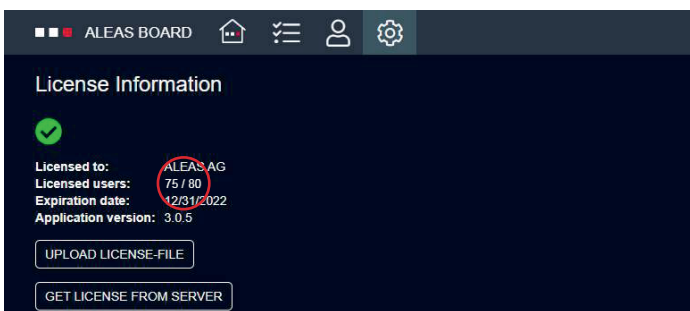

A feature many teams have been waiting for: In presentation mode not only sticky text edits are now transmitted „live“, but also the changes in the description editor. Whenever the presenter adds or adapts editor content, all other users will be able to see the changes in real-time.

INCREASED NUMBER OF STICKIES PER BOARD

Due to our new framework and other improvements we have been able to increase the number of stickies per board to a maximum of 3.000.

LICENSED USERS

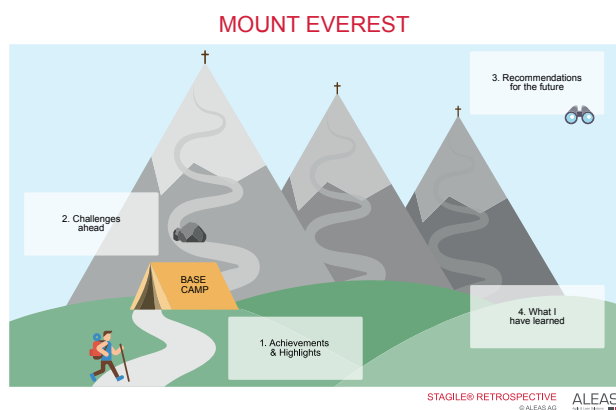

The number of available licenses as well as the number of licenses currently in use is now visible for system admins in the license menu. The number of licensed users is updated in real-time whenever a license has been (de)allocated.

NEW TEMPLATES

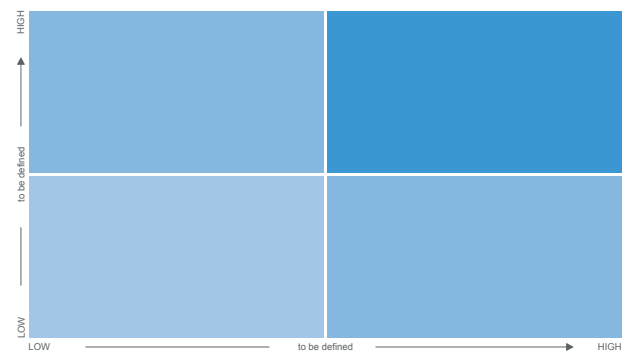

ALEAS BOARD RELEASE #2022-11

We have added a variety of new templates to the Template Manager, which are available for all ALEAS Board users. Most of the new templates can be edited using the integrated Template Editor.

The new templates include for example:

Mount Everest Retrospective

Low-high Matrix

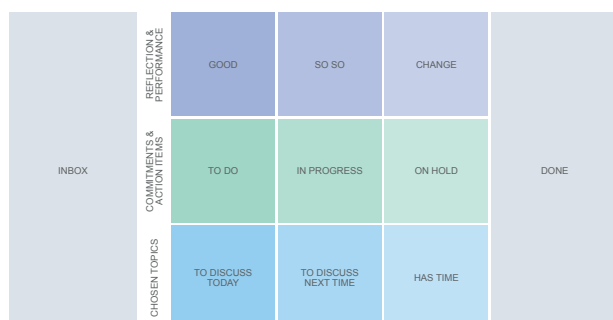

Purpose, Objectives, Results, Effects/Impact

WORKSHOP FEEDBACK

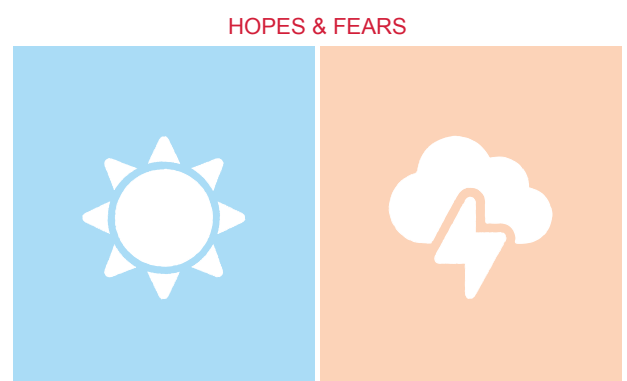

| | EXCELLENT | VERY GOOD | OK | MINOR IMPROVEMENTS | MAJOR IMPROVEMENTS |
|---|-------------------------|--------------------|----------|--------------------|--------------------|
| Workshop Preparation (Agenda, Prep Mail, Time, Location, ...) | | | | | |
| Moderation (Breaks, Speaking Time, Keep on Track, Guidance, ...) | | | | | |
| Workshop Results (Outcome, Value of Time, Take Away, ...) | | | | | |
| | MUCH MORE THAN EXPECTED | MORE THAN EXPECTED | ACHIEVED | PARTLY ACHIEVED | NOT ACHIEVED |
| My Expectations | | | | | |
| | MUCH BETTER | BETTER | SAME | LOWER | MUCH LOWER |
| Mood Level After Workshop | | | | | |
