BOARD

WHAT IS NEW?

ALEAS BOARD RELEASE #2020-10

Dear ALEAS Board user,

we are very excited to announce that another improved and enhanced version of the ALEAS Board is now available. ALEAS Board has proven itself to be a valuable platform for distributed teams during the challenging last months and we hope to make your remote collaboration even simpler and more efficient.

So, what exactly is new?

added

- **Personal Task List:** Overview of all your stickies on all boards with full filter functionality.
- **Due Date:** Simply add a due date to your sticky with drag & drop. Stickies can now also be filtered according to date.
- **Bird View:** Quickly navigate around the board and switch between frames with just one click.
- **Description Editor:** Sticky description editor now supports text editing, images, tables etc.
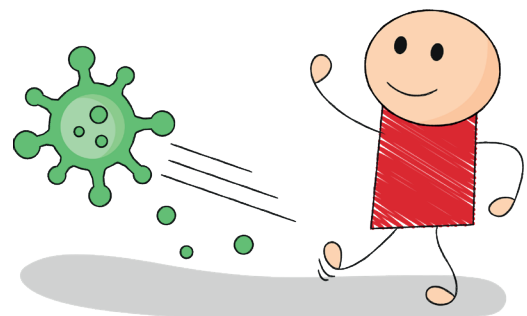

improved

- **Presentation Mode:** You can now take over the presenter with just a click and the presenter movement is visible for other users.
- **Templates:** Templates can now be uploaded as SVG files and downloaded directly from the board.
- **Jira Integration:** New fields and issue types, full text search for Jira stickies, filter for non-Jira stickies, optimized authentication process, easy Jira activation or deactivation for each board etc.
- **Undo:** The undo feature has been improved and enhanced.
- **Performance:** The board loading time and overall performance has been further improved too.

For detailed information on all tools and features have a look at **www.aleasboard.com**.
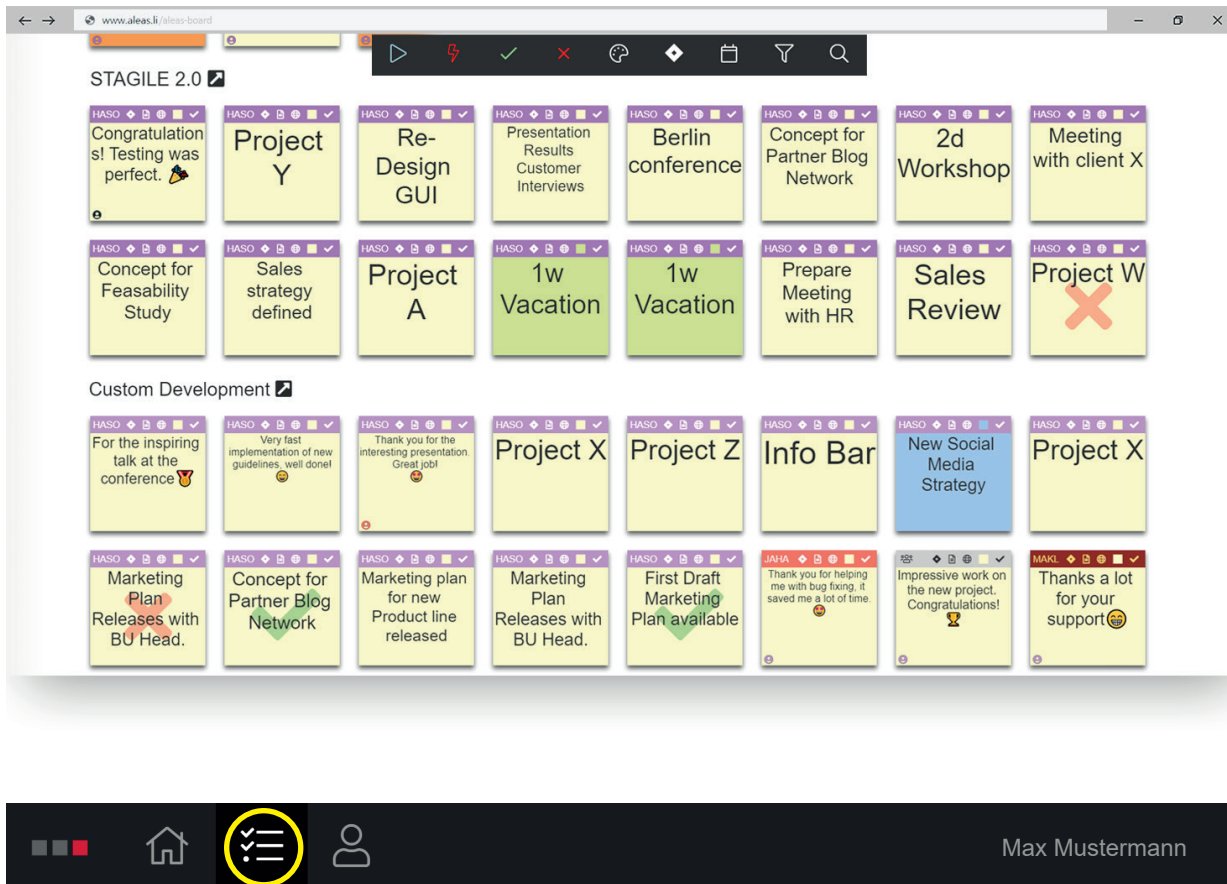

As always we appreciate your ideas, suggestions and feedback!
You can contact us at support@aleas.li.

All the best,
the team at ALEAS

TASK LIST
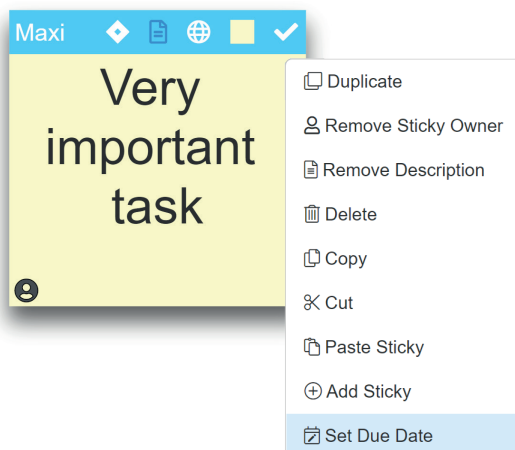

ALEAS BOARD RELEASE #2020-10

- The Task List is a new feature that gives you a complete overview of all stickies you are owner or assignee of.

- If you set a due date (see next page), the stickies will be sorted by date.

- The task list is synchronized in real-time. All stickies are fully functional, you can change the text, edit descriptions or links, export to Jira etc.

- In your task list you have access to all boards, for which you have at least read access. The boards are listed in alphabetical order.

- The Filter Bar is available with all the usual filter and search functions.

- With a click on the button next to the board title you can jump into this board. ↗

- A right click on a sticky allows you to open the sticky directly in the linked board.
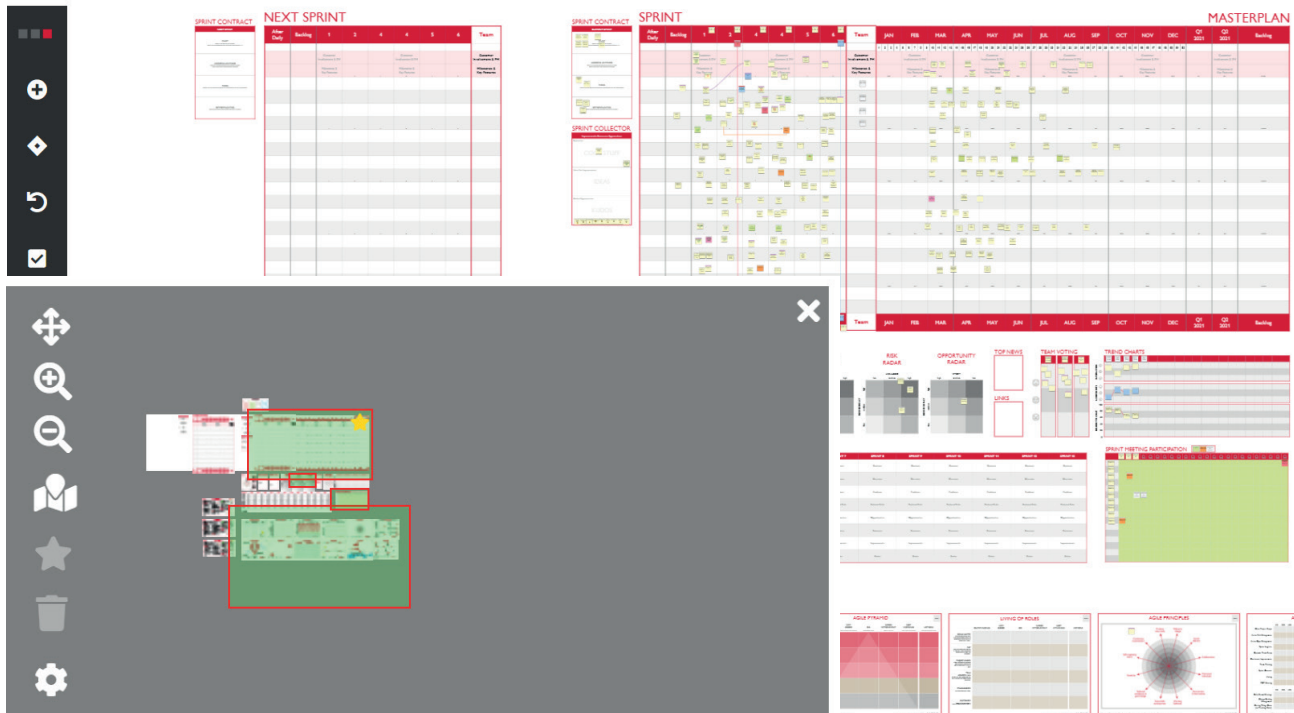

DUE DATE

- You can now add a due date to all your stickies, either with drag & drop from the calendar (which can be opened by clicking on the new button in the top right corner of your board) or with a right mouse click.

- A new filter option in the Filter Bar allows you to filter your stickies according to due date. You can select multiple dates at the same time (keep the shift or strg key pressed), e.g. a whole week or month at once.

- The due date can be changed in the Lens and the Task List as well.

BIRD VIEW

ALEAS BOARD RELEASE #2020-10

- Quickly navigate around the board with our new Bird View feature. Simply click on the template preview in the minimap in the lower left corner to jump to the respective board section.

- With the resize button (default zoom) ✛ you now have a view of the complete board.

- The board admin can save „frames" (snapshots), which is especially useful for Scrum meetings. Navigate to the board section you want to save and click on the „Create Frame" button. 🗺️
The frame will be outlined by a red border. All board members can then use the frames to navigate around the board.

- The most important frame can be marked as „favorite" by the board admin (yellow star) and will then be set as default view when opening the board.

- Several of the lesser used buttons have been moved to the Bird View, which makes the toolbar more compact.

- By holding down the left mouse button you can draw up a field in the Bird View in order to navigate to this area with the respective zoom factor.

# DESCRIPTION EDITOR

ALEAS BOARD RELEASE #2020-10

- The IntelliSticky Description Editor now offers many more design options. You can choose different fonts and colors, tables, bullet points etc.

- It is also possible to integrate images directly into the editor, either with the upload button or with copy & paste.

- Please note, that in order to keep the board as performant as possible, the amount of content in the editor is limited.
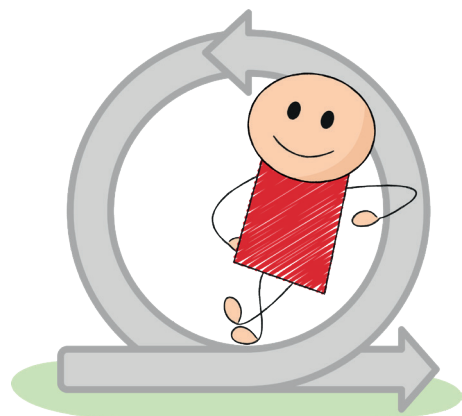

PRESENTATION MODE

## ALEAS BOARD RELEASE #2020-10

- The presentation mode has been improved, to make your meetings even more efficient.

- One click on the pointer is enough to take over as the active presenter.

- The movement of the pointer and sticky notes moved by the presenter is now displayed for all users.

- When the presenter opens the Description Editor it is visible for all viewers (read-only).

- For better visibility stickies selected by the presenter are now marked with a golden shading.
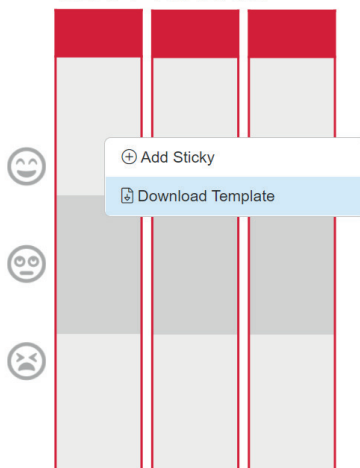

TEMPLATES

- Placement of templates can now be individually defined during upload.

- Templates can be be uploaded as SVG files, in addition to PDF, PNG and JPG.

- You have also the option to download templates as a SVG file with a right mouse click on the respective template. (Please note that the template mode has to be <u>de-activated</u> to do so.)

JIRA INTEGRATION

ALEAS BOARD RELEASE #2020-10

- Optimized authentication process: Only one Jira login is necessary when accessing ALEAS Board for the first time, the credentials will then be saved for every future login across all boards.

- Easy Jira activation and deactivation by the board admin for each board in the Dashboard (new button in the top right corner of the board tile). A blue button means Jira is active.

- New fields have been addded: Due Date, Labels, Priority (full sync) and Sprint (one way sync, that means read-only).

- New issue types are available: Sub Task and Epic (key is necessary).

- A full text search for Jira stickies (applies to all properties) has been integrated into the Filter Bar. There's also a new filter button for non-Jira stickies.

- Required Jira fields are now dynamically supported in the export dialogue (depending on the project mandatory fields will change).

- The import dialogue is now bigger and thus displays more information at a glance.
